

mindflow, write your ideas in a clear way

JINWEN XU

2021/05/23

1. INTRODUCTION

The mindflow package provides you a way to write your ideas and annotations clearly. For example, with the options `linenumber` and `rightmarker`, you will get:

1	What to write next:	*
2	• usage;	*
3	• some internal macros;	*
4	• an example maybe;	*
5	• the complete code.	*

2. USAGE

2.1 Initialization

Simply load the package with

```
\usepackage{mindflow}
```

There are a few options available, which are listed in the next subsection.

2.2 Options

By default, the environment has no line numbers or markers. You can use the following options:

<code>linenumber</code>	Same as <code>leftlinenumber</code>
<code>leftlinenumber</code>	Enable left line numbers
<code>rightlinenumber</code>	Enable right line numbers
<code>leftmarker</code>	Enable left marker, by default it is a “*”
<code>rightmarker</code>	Enable right marker, by default it is a “*”
<code>incolumn or twocolumn</code>	The separation line would fit in the column (<i>automatically applied in two-column documents</i>)
<code>off</code>	Hide all the mindflow environments

`{mindflow}` Then you can use the mindflow environment as

```
\begin{mindflow}  
  <text>  
\end{mindflow}
```

2.3 About the line numbers

- 1 You can also add line numbers to the other part of your document in the usual way. For
- 2 example, line numbers have been turned on for this paragraph with `\linenumbers`.

6	Line numbers within the mindflow environments are independent from those of the main text.	*
---	--	---

- 3 (*I recommend that you put an empty line before and after the mindflow environments, i.e. make*
- 4 *the mindflow environment a paragraph of its own. This way, your paragraph structure won't get*
- 5 *changed when you use the `off` option.*)

The feature of line numbering is provided by the package `lineno`. You can read its documentation to learn more about it. Notice that, by default, displayed equations are not numbered. You can add the following line before `\usepackage{mindflow}`:

```
\PassOptionsToPackage{mathlines}{lineno}
```

to enable the line numbers for displayed equations.

7	$(a+b)^2 = a^2 + 2ab + b^2$	*
8	$(a+b)^3 = a^3 + 3a^2b + 3ab^2 + b^3$	*

3. SOME T_EXNICAL DETAILS

<code>\mindflowTextFont</code> <code>\mindflowNumFont</code> <code>\mindflowMarkerFont</code>	The font for text, line numbers and markers within the <code>mindflow</code> environments can be specified by redefining <code>\mindflowTextFont</code> , <code>\mindflowNumFont</code> and <code>\mindflowMarkerFont</code> . By default, they are defined as:
	<pre>\newcommand{\mindflowTextFont}{\normalfont\footnotesize} \newcommand{\mindflowNumFont}{\normalfont\scriptsize\ttfamily} \newcommand{\mindflowMarkerFont}{\normalfont\scriptsize\ttfamily}</pre>
<code>\mindflowLeft</code> <code>\mindflowRight</code>	The left and right markers is defined by <code>\mindflowLeft</code> and <code>\mindflowRight</code> . Both have the default value <code>"**"</code> .
<code>\mindflowLineHeight</code>	The height of the separation lines is a length macro named <code>\mindflowLineHeight</code> , with default value <code>0.4pt</code> . You can change this with <code>\setlength</code> .
<code>mindflowLine</code> <code>mindflowText</code> <code>mindflowNum</code> <code>mindflowMarker</code>	And finally, the colors for the separation lines, text, line numbers and markers within the <code>mindflow</code> environments are called <code>mindflowLine</code> , <code>mindflowText</code> , <code>mindflowNum</code> and <code>mindflowMarker</code> , respectively. By default, they have the same color as the context, with opacity 30% for the separation lines, text and markers, and 8% for the line numbers.

4. AN EXAMPLE

With option `leftlinenumber`, `rightlinenumber`, `leftmarker`, `rightmarker` and the following settings:

```
\colorlet{mindflowLine}{green!50!black}
\colorlet{mindflowText}{blue!50!cyan}
\colorlet{mindflowNum}{red!50!orange}
\colorlet{mindflowMarker}{orange}
\renewcommand{\mindflowTextFont}{\normalfont\footnotesize\sffamily\itshape}
\renewcommand{\mindflowNumFont}{\normalfont\small\footnotesize\ttfamily}
\renewcommand{\mindflowMarkerFont}{\normalfont\footnotesize\sffamily}
\renewcommand{\mindflowLeft}{\hspace{1em}\(\succ\)}
\renewcommand{\mindflowRight}{\(\prec\)\hspace{1em}}
\setlength{\mindflowLineHeight}{1pt}
```

One gets:

9	➤	<i>Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.</i>	➤	9
10	➤		➤	10
11	➤		➤	11
12	➤		➤	12
13	➤		➤	13

5. IMPLEMENTATION

Below is the complete source code of this package.

```

1 \RequirePackage{kvoptions}
2 \SetupKeyvalOptions{%
3     family = @mindflow,
4     prefix = @mindflow@
5 }
6 \DeclareBoolOption[false]{off}           % Turn off mindflow
7 \DeclareBoolOption[false]{leftmarker}    % Left marker
8 \DeclareBoolOption[false]{rightmarker}   % Right marker
9 \DeclareBoolOption[false]{linenumber}    % Left line numbers
10 \DeclareBoolOption[false]{leftlinenumber} % Left line numbers
11 \DeclareBoolOption[false]{rightlinenumber} % Right line numbers
12 \DeclareBoolOption[false]{twocolumn}     % Two column
13 \DeclareBoolOption[false]{incolumn}      % Separation line fits in column
14
15 \ProcessKeyvalOptions*\relax
16
17 \if@mindflow@twocolumn
18     \@mindflow@incolumntrue
19 \fi
20 \if@mindflow@linenumber
21     \@mindflow@leftlinenumbertrue
